Carbon, Alberta, Thursday, Jan 5th, 1928

\$2.00 a Year

### WEDDING BELLS

#### MOOREHOUSE-WILLIAMS

A wedding of interest to Carbonites took place in Calgary on Thursday, Dec. 29, when Miss Mary Dorothy Williams was united in marriage to Carl Moorhouse, of Carbon, the ceremony being performed by the bride's brother, Rev. E. Williams, of High River.

The young couple left to spend a short honeymoon in High River and are expected to return today.

#### PURVIS-VAN WART

ACME, Dec. 30. — A very pretty wedding occurred when Miss Edith Van Wart, Eldest daughter of Mr.

and Mrs. E. H. Van Wart, of Grainger and Alan J. Purvis, eldest son of Mr. and Mrs. N. H. Purvis, of Acme, were united in marriage at the home of the bride's parents by the Rev. J. C. MacLennan.

The bride was beautifully gowned in deep, old Rose cut velvet, and her sister, Phyllis, acted as bridesmaid. The groom was supported by Robert Van Wart, brother of the bride.

Both young people are held in high esteem throughout the community. The bride's father has been a municipal councillor here for many years. The groom teaches the intermediate room of the Acme School.

### CAPT. DANCEY TO SPEAK IN CARBON THURS., JAN. 12

Capt. S. N. Dancey, noted speaker on subjects of patriotic nature will speak to the people of Carbon on Thursday, Jan. 12th. Captain Dancey has been speaking all over the country and the Carbon Board of Trade has been fortunate in getting this man to come to Carbon to address the people, and as a community effort their should be a great response from the citizens of Carbon and district. There is a program of Capt. Dancey's visit published in this issue.

### LITTLE ITEMS OF LOCAL INTEREST

#### FOR SALE

150 tons of prairie hay at Acme in stack or F.O.B. cars.

J. FISHER WILLIAMS,  
319-20th Ave., W.

## ADVERTISE YOUR WANTS IN THE CHRONICLE

## United Grain Growers, Limited Twenty-Year 5% First Mortgage Bonds

Due January 2nd, 1948

These Bonds offer an attractive opportunity for investors and should particularly appeal to residents of Western Canada because of their familiarity with the business of United Grain Growers, Limited, and the success that has attended its operations during the last twenty-one years.

The new issue of \$3,750,000 First Mortgage Bonds is for the purpose of retiring outstanding obligations and of re-investing the Company for expenditures in connection with the newly completed \$500,000 bushel elevator at Port Arthur and the recent acquisition of certain country elevators.

The Bonds are adequately secured by assets, while, for five years ended August 31, 1927, net earnings available for interest and depreciation, have averaged more than 4 1/2 times annual interest requirements on all Bonds to be presently outstanding.

Bonds may be obtained in denominations of \$500 or \$1,000. Principal and half-yearly interest are payable at any branch in Canada of The Royal Bank of Canada.

Price: 96.25 and interest,  
yielding over 5.30%

\* Fully descriptive circular will be gladly furnished upon request.

## Britain Forges Ahead

Those prophets of gloom who have been predicting the rapid decline of British power and prestige throughout the world, and those with whom the wish for such a catastrophe has been the father of the thought, must surely be beginning to realize that they will have to revise their opinions and recall their predictions. For evidence accumulates, and fact is being piled upon fact, which go to demonstrate the virility, prestige and power of the Old Land and the Empire as a whole.

Notwithstanding the fact that Germany was particularly bitter against Britain for entering the world war, and sung its hymn of hate because it realized that the British entry into the conflict spelled defeat for Germany, it is a fact today that a more friendly feeling exists in Germany towards Britain than is entertained for any other nation which was allied against her.

For a time the anti-foreign feeling in China was interpreted as being largely an anti-British feeling, for the cultivation of which Soviet Russia was largely responsible. But the inevitable reaction has now set in as the true designs of Russia and the true nature of British policy is becoming disclosed and understood.

At the meeting of the Institute of Pacific Relations held at Honolulu last July, Sir Frederick Wrayte, chief unofficial spokesman for Great Britain, presented a memorandum on the history of Anglo-Chinese relations from the time of Lord Macartney's mission in 1783 down to the famous communication of Sir Austen Chamberlain of a year ago. This memorandum dealt fairly with the mistakes made by both nations, and it demonstrated from the past acts of Great Britain that the conciliatory attitude of Sir Austen Chamberlain's document was the logical outcome of those acts.

It is interesting to recall at this time, when the Nationalists of China are breaking off diplomatic relations with Soviet Russia, the manner in which Sir Frederick Wrayte's memorandum was received by the Chinese Nationalist delegates at the Honolulu meeting. These delegates had distributed in advance a printed case against Great Britain, which was replete with sharp strictures on British foreign policy. But when Sir Frederick presented the other side, so impressed were the Chinese delegates by its fairness and by the British point of view that they withdrew their own document and asked for the return of the copies distributed. This is hardly a sign of British decadence in world affairs, or an evidence of loss of prestige. The fact that anti-British feeling in China is gradually dying down is the result.

Surely and steadily Great Britain is regaining her position as the financial centre of the world. The pound sterling has returned to par, even in New York, and the flow of gold, which has been almost continuous to the United States for some years past, has recently had an offset in the first gold shipment from New York to London. Great Britain continues promptly on due date to make her enormous payments to the United States on account of war obligations, and with every payment made her position becomes stronger.

British financial institutions and industrial concerns are more and more regaining their position in world markets, and whereas during the war British investments and securities in foreign lands and in the overseas Dominions had to be withdrawn in order to carry on the grim struggle, British investors are again active throughout the world.

As carriers of the commerce of the world, and the great commercial clearing house for all nations, Britain remains supreme. In ship building, despite all the efforts of other nations, Britain retains the leadership by a wide margin.

And to this general improvement in position the overseas Dominions of the Empire, led by Canada, are contributing an ever increasing share.

## Prince Of Gypsies Buried In Splendor

Thousands Of Delegates Attended  
Funeral In Czechoslovakia  
Dressed in medieval splendor, Her-

vath, Prince of the Gypsies, has been borne to his grave in Parkany, Czechoslovakia, while thousands of Central European gypsies mourned at his bier.

His coffin was of ebony and his body dressed in rich silk brocade. In his hand was a whip to symbolize mastery over horse and wife, while at his side were wine and liquor bottles so that he might treat his old friends in Limbo.

At least a thousand delegates from Burgundian, Hungarian and Rumanian gypsy tribes attended the funeral, headed by 50 musical bands, most of them on horseback.

The thoughts of a music composer should be noteworthy.

## Titled Taxi Drivers

Many Russian Nobility Are Chauffeurs In Paris

There was a time when the Paris taxi drivers were simply bachelors of art and candidates in philosophy. This has all changed. They are now Counts, Dukes, Marquises, Colonels and Generals. The Russians have aristocratized them. But there are also many genuine Russians among them. They may be picked out by their gracious manners, their broad smiles, their ignorance of the city map, and I believe they swear by St. Anastasia instead of a real Gallic Saint. Indignant Vox Populists have written to the papers recently that these Russian ex-Grand Dukes and Caucasian Hetmans are not only ignorant of the Paris labyrinth, but that they refuse to learn their geography. One lady reports that the driver took her for a long ride, altogether out of the direction of the address she had given, and persisted in looking around at his charge with a broad smile. As he kept up a brisk pace and a brisk pace in Paris means something she did not venture to jump out. Finally they were halted by a signal at a crossing. The lady called a gendarme, "What do you mean?" asked the latter of the chauffeur, "Don't you know the streets?" "Sir," replied the ex-Colonel or ex-General, "your Commander-in-Chief has never sent me the plans. How can I advance without maps?" A phrase reminiscent of the Russian front, perhaps.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With so sterling a remedy at hand no child should suffer an hour from worms.

## A Paying Occupation

Picking boll weevils off of cotton sometimes is more lucrative than picking the cotton itself. J. R. O. Lindsey, Richmond, Va., recently shipped 72,000 of the pests to the Florida State Agricultural College at \$2.50 a thousand. At that rate a fast picker could earn \$10 a day.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

## The Wonder Of Dry Ice

New Product Evaporates Slowly and Leaves No Liquid

In a recent electrical exposition in New York, a castle was shown made of dry ice. One of the wonders of the new product is that it does not leave any liquid as it slowly evaporates. It is solid carbon dioxide which has been frozen to a temperature of 109 degrees below zero.

The principal use of dry ice is for the refrigeration of perishable foods in transit. This may be a pint of ice cream which the housewife is carrying home from the store, or a refrigerator car of fruit speeding from the west coast of Ontario.

To carry home the ice cream, the pint package of the cream is placed in a slightly larger paper package which permits a piece of dry ice to lie against the package of cream. On arriving home the housewife can leave the package of cream standing on a table for six hours because the dry ice lasts that long.

Next summer on those hot days you can carry a piece around in your pocket and keep cool.

## A Wish For Lindbergh

The youth of a country might be worse employed than in admiring the Lindbergh type of character. Canadians share with Americans the hope and prayer that Lindbergh may come safely to the end of his every aerial flight and live in health, joy and wealth, to die in bed at a great old age.

London has a tipless hotel. Patrons are firmly but courteously notified that it is against the rules of the hotel to offer tips. The servants are well paid, and reservations at this hostelry are always at a premium.

## Smelter Doing Big Business

Plant At Trail, B.C., Pays \$1,000 Per Hour In Wages

Some interesting figures in connection with the plant operated by the Consolidated Mining and Smelting Company at Trail, B.C., have been made public by W. E. Payne, secretary of the Vancouver Board of Trade, following a recent visit into the interior.

The smelter has a capacity of 750 tons of refined metals per day, and it is the largest metallurgical plant in the world.

The lead output is 400 tons daily, or one-tenth of the world's entire output.

The copper output runs 70 tons daily.

During the past year the plant has required 5,900 tons of construction steel, 3,500,000 bricks, 4,500,000 feet of lumber, one carload of cement every two days, 118,000 tons of coal per year and 62,400 tons of coke per year.

The freight bill last year was \$3,600,000, or 1 per cent of the total freight paid in Canada.

Eight million dollars were paid out in wages, or approximately \$1,000 per hour. Added to this the cost of supplies would bring the expenditure to almost \$3,000 per hour.

Last year the company earned profits of approximately \$14,000,000.

## Wooden Railway Cars

It has been shown that all the deaths in the railway collision at Dockrill occurred in a wooden coach which was crushed between two others made of steel and there is a general opinion that the practice is bad. Either wooden coaches should not be used or they should not be combined with those made of heavier material. Recent accidents have shown that wooden coaches stand little chance in accidents.

It doesn't take much of a genius to discover a scheme that won't work.

## Medical Clinics In Egypt

Government Using Modern Method To Quell Old Disease

American aid is to be enlisted to fight anti-modern plagues in Egypt, such as bilharzia.

The Egyptian Government has just come to terms with the Rockefeller Foundation for the establishment in Egypt of clinics for the treatment of intestinal and parasitic diseases. The Foundation will pay the salary of an American sanitary engineer, who will be provided by the Egyptian Government with a staff, offices and accessories, and the Government will exempt from customs dues all imports from the United States required in the prosecution of the work.

## A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be  
In Every Home Where  
There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe, as they are absolutely guaranteed free from opiates or any other injurious drug.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes: "I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Even the man with a lot of getup about him can't resist the temptation to remain under the covers for 30 minutes after the alarm clock goes off.

FOR  
COLDS

# ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin;  
it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

## Some Tips For Inventors

Few Of Things Needed Are Included  
In List

New challenges to inventive genius are the latest entries in the "What's Wanted" book maintained by the Institute of Patentees in London, in which suggestions for needed inventions submitted by the public are filed.

An unbreakable shoe lace, a mechanical bricklayer, a folding umbrella that can be carried in the pocket—these are some of the devices laymen want. Particularly in demand are inventions that will make a dwelling more comfortable to live in, and ease the housewife's tasks. These are some of them:

Vacuum cleaners for the chimneys.  
A way to prevent water in house pipes from freezing.

Apparatus to remove deadly carbon monoxide and unwanted carbon dioxide gas from living room air.

Another machine to fill the air with health-giving oxygen at low cost.

Windows of unbreakable, clear flexible glass.

A means of cleaning windows by machinery.

A better way of fastening carpets than by the use of tacks.

Non-slippery floor polish.

Permanent paint for gas stoves.

A way to uncork bottles without destroying the corks by a cork-screw.

## Winnipeg Newspaper Union

A Daytime Frack Of Smart Distinction

The discriminating mistress or small woman will find this an unusually smart and becoming frock. Of special interest is the revers, which may be of matching or contrasting material, and the set-in pocket placed at the upper left and lower right side. The skirt has two box-plaits in front, and is joined to the bodice, while the back is in one piece, and the long sleeves have shaped cuffs trimmed with buttons. No. 1669 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3½ yards 39-inch or 2½ yards 54-inch material. If the revers is made of contrasting material, ¼ yard additional 39-inch (cut crosswise) is required. Price 20 cents the pattern.

Many styles of smart appeal may be found in our new Fashion Book. Our designers originate their patterns in the heart of the style centres and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

Write for free booklet to SPONN MEDICAL CO., 577, 2nd ST., CINCINNATI, OH.

## Longevity Of Germs

Found Alive And Deadly After Being  
In Sealed Tube 26 years

Experiments carried out by Sir William Simpson, the expert on tropical diseases, to test the longevity of germs, have had remarkable results. Twenty-six years ago Sir William placed in a test tube some germs taken from a South African patient who was suffering from one of the most deadly of tropical diseases. The tube was sealed.

Recently, Sir William opened the test tube. He was astonished to find that the germs were still alive and as deadly as ever.

A guinea pig which was inoculated with them died soon afterwards.

The only food the germs had during their long imprisonment was a kind of jelly called "Agar," which was put in the test tube with the germs 26 years ago.

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Eclectic Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

## When the Worm Turned

Judge: "Why do you want a divorce?"

Fair Plaintiff: "My husband is a fiend in human form. He thinks nothing of knocking me down or pushing me down stairs. He often throws boiling water on me, threw me out of the window twice, and once—Judge, I can stand other things, but not this—once he wiped his hands on one of my guest towels."

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Eclectic Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

## Tailor For Indians

When Lo, the poor Indian, wants a stylish war bonnet or a fancy beaded vest, the chances are that he'll buy them from a white man. Robert F. Backus, of Florence, Cal., who makes a hobby of fashioning Indian garments, has filled hundreds of orders from various western tribes. Last summer he supplied the materials for the headaddress which was presented to President Coolidge in the Black Hills. It was valued at \$2,500.

## The King Of Pain—Minard's Liniment

When building a grandstand engineers must make allowance for "the weight of excitement" or the additional strain given when excited spectators jump up and down.

The greater the difficulty the more glory there is in surmounting it.

## LESSON No. 16

**Question:** Why do growing children, particularly girls, need emulsified cod-liver oil?

**Answer:** Growing children, and particularly girls, need vitamin-rich nourishment to help them through critical stages of extreme tax on their strength.

Pleasantly flavored, easy to take, children like

## JESUS AND THE SICK

Golden Text: "He hath done all things well; He maketh even the deaf to hear, and the dumb to speak."—Mark 7:37.

Lesson: Mark 1:21-45.

Devotional Reading: Psalm 103:1-8.

## Explanations and Comments

I. The Authority Of Jesus As a Teacher, verses 21, 22.—In New Testament times sacrifices were offered only in the temple at Jerusalem, but every town and village had its synagogue for worship, an institution which evidently had its origin during the Babylonian captivity. On a certain Sabbath day Jesus taught in the synagogue at Capernaum (built by the centurion whose faith Jesus commended, Luke 7). In the synagogue worship, after the recitation of the "Schema" (Deut. 6:4-9; 11:13-21), and the offering of prayer, a lesson was read from the Law (Pentateuch), and another one from the Prophets. It was customary for the chief ruler of the synagogue, who had charge of the services, to ask a distinguished visitor to read and explain the lessons. Upon this occasion he called upon Jesus for this service.

As the congregation listened to Jesus they were amazed at his teaching, for he taught them as one having authority, and not as the scribes. The scribes constantly cited some well-known rabbi as authority for their teaching; Jesus said, "Verily verily, I say unto thee, 'We speak that which we know, and bear witness of that which we have seen.'" John 3:11. As has been well said, there was no "perhaps" in the teaching of Jesus. Recall the phrase often repeated in the Sermon on the Mount, "I say unto you." The highest praise for a scribe was that he resembled a cemented cistern which lost no drop of water put into it. He was bound never to teach otherwise than as he had been taught. Christ as a teacher was not a cistern, but a spring. Clear, abundant and perennial.

"Men crave to know; they want certitude; they long to be sure. And to them Christ presents Himself as the Truth, God's Everlasting Yea, the answer to all their questioning."—J. D. Jones.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

## Farmers Lose Money

Better Handling Of Cream Would  
Reduce Losses

Saskatchewan farmers lost considerably more than \$50,000 during the year ended October 31 as a result of cream being graded down for various causes, according to Percy E. Reed, dairy commissioner for Saskatchewan, broadcasting a lecture under the auspices of the Saskatchewan Farmer Radio Farm School.

Better handling methods, would have saved a good deal of this loss. Mr. Reed declared. During the period under review there were 83,993 cans of cream graded No. 2 or "off" because of high acidity or the presence of other undesirable foreign flavors. This, however, only provided for 13.5 per cent. of the total output, the remaining 86.5 per cent. grading No. 1 or better.

Of the total amount graded down 15.6 per cent., or 12,944 cans, was put down because of bad flavors in the cream and French weed, or stink weed as it is more popularly known, was largely responsible for this.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

## Credit Goes To Egyptians

Solved Problem Of Measuring Earth's  
Surface In 1800 B.C.

Russian scientists have just completed the study of what is said to be one of the most remarkable Egyptian parchments in history.

The parchment has been decided after years of painstaking labor by Professors B. B. Turaleff and Starve, noted orientologists. The document is said to shed new light on the mathematical studies of the ancient Egyptians, establishing the earth's surface as well as the globe was solved by the Egyptians in 1800 B.C., whereas the solution of this problem heretofore has been attributed to Archimedes, who lived in the third century, B.C.

Some people make a specialty of exchanging their brass for other people's gold.

For frostbite use Minard's Liniment.

More than half the people in the world live in Asia, on less than one-fourth of the earth's surface.

Keep a Box  
Always Handy!

Zam-Buk provides an ever-ready and reliable first-aid for injuries. It is also unequalled as a soothing, speedy remedy for obstinate and deep-seated skin disease, poisoned wounds, ulcers, piles, etc.

Within every box of Zam-Buk are stored the most valuable healing, soothing and antiseptic properties known to Science. Its unique herbal composition and its absolute freedom from animal fats and mineral drugs make Zam-Buk the safest and best dressing for skin troubles of all kinds.

Get a 50c box of this great herbal healer from your druggist or dealer to-day, or ask Zam-Buk Co., Toronto, to mail FREE TRIAL SAMPLE.

## The Destruction Of Wolves

As a result of the efforts of the North West Territories and Yukon Branch of the Department of the Interior, Canada, 680 wolves were destroyed during the last recorded fiscal year by natives and white men.

## Hoarse?

Rub throat and chest thoroughly with Minard's Liniment. Quick relief assured.

The Jordan has been accounted the most crooked stream in the world. But it cannot compare with White River, Arkansas, which travels 1,200 miles in traversing a distance of 50 miles.

## Sorema Remedies Get Results

Sorema Ointment penetrates inner layers of the skin, searching germs of all skin diseases. Hence its gratifying results in Eczema, Pruritus, etc. Price 21¢. Sorema Blood Alterative Tablets, powerful, effective, non-purgative blood purifiers. Price 75¢ for 15-day treatment. Sorema Ltd., Dept. A111, Winnipeg.

## A BROKEN DOWN SYSTEM.

This is a condition (for disease) to which doctors give many names, but which few of them really understand. It is simply weakness, a break-down, as it were, of the vital forces that sustain the system. No matter what may be the cause (they are almost numberless), its symptoms are much the same, the more prominent being sleeplessness, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what alone is absolutely essential in all such cases is increased vitality—vigour, vital strength and energy to throw off these morbid feelings, and as night succeeds the day this may be more certainly secured by a course of THE NEW FRENCH REMEDY, THERAPION No. 3 than by any other known combination. Securely as it is taken in accordance with the directions accompanying it, will hasten the return of health to THE EXPIRING LAMP OF LIFE LIGHTED UP AFRESH, and a new existence imparted in place of what had so lately seemed worn-out, used up, and valueless. This wonderful medicine is suitable for all ages, constitutions and conditions, in either sex; and is so difficult to imagine a disease or derangement whose main feature is weakness, that will not be speedily and permanently overcome by this recuperative essence, which is destined to cast into oblivion everything that had preceded it for the wide spread & numerous class of human ailments. Sold by leading Chemists, or other No. return mail from Dr. L. L. L. Co., Montreal, Quebec, N.W. & London.

## MANY BRITISH SETTLERS COMING TO CANADA SOON

Ottawa.—The coming to Ottawa next month of Hon. L. C. Amery, Dominion Secretary of the British Government, probably will lead to a final determination of a large program of British migration to Canada. It was privately submitted to the British authorities some months ago but the decision was deferred until Mr. Amery had an opportunity of looking personally into the matter and securing first-hand information.

Considerable reticence is maintained here as to details pending a formal discussion of the question, but the plan is known to contemplate an elaboration of the family settlement scheme by which, at the end of this year 3,000 families will have migrated. In the original period set, only 2,500 families came and hence the agreement was extended to cover the balance.

The new plan, however, will be different and generally speaking, if approved, will look to the establishment of groups or colonies of British settlers in parts of the country where the opportunities are considered most promising. While the movement would not be directed to unsettled localities, it would be designed to involve considerable pioneering, similar to that accomplished by British colonies in the early stages of Western development in the nineties. A feature of the plan would be that which would provide for expert supervision by experienced people of the location of the groups and for assistance to them in the problems connected with absorption into Canadian life. The plan would be worked out on a basis of co-operative contribution by the British and Canadian Governments.

It is stated that the success of the Empire settlement plan, confined largely to soldier lands, having been demonstrated the new scheme, if given effect will eventually lead to the migration of as many as 20,000 families.

### Instruct Future Citizens

Arrangements Being Made For Study Of League Aims In Canadian Schools

Geneva.—Canada is instructing her future citizens in the aims of the League of Nations.

Ottawa.—The League of Nations has prepared a special chapter on the League which will be included in school readers and has adopted regulations requiring all students of the tenth grade in secondary schools to study a special pamphlet drawn up by the Canadian League of Nations Society.

The Lieutenant-Governor of the Province of Saskatchewan has made arrangements for study of the League in schools in that province, and Ottawa has called the attention of all provincial governments to the importance of teaching the doctrines of the League.

### Honoring Mrs. Lindbergh

Will Receive Gold Medal From Detroit Board Of Education

Detroit, Mich.—The Detroit Board of Education has voted to confer a gold medal of honor upon Mrs. Evangeline Lindbergh "in recognition of the great value to this nation and the public school system of the qualities of motherhood she has exhibited."

This and her qualities of "patriotism, loyalty, valor, heroism, courage, efficiency and the pursuit of the better and higher things in life" were cited by the board in adopting a resolution to confer the medal.

### Plans Flight Over North Pole

Ottawa.—An Italian explorer, General Nobile, wants to fly over the North Pole next summer and Dr. Bonardelli, Italian consul here has been asked to secure from the Canadian Government maps and other data. Not much has been learned of the project apart from the fact that it is for scientific purposes. The flight would be in a dirigible.

## To Fly Over London

Canadian Farmers To See World's Metropolis From the Air

London.—A unique sight-seeing tour has been arranged for the 125 Canadian farmers who are coming to England in January with the Canadian National Railways' Farmers Marketing Party. In addition to seeing London as the average man sees it—obtaining a worm's eye view from underground and a normal view from the top of a bus—the visitors will see London as the birds see it, from the cabin of one of the most up-to-date air liners of the Imperial Airways, Limited.

As many of the Canadian farmers as desire to do so will be taken for a 20-minute "joy-ride" over London and down the Thames. Should a sufficient number signify their intention of taking to the air, two or even three of the latest "Silver Wing" passenger planes "de luxe" will be brought into service to cruise over London together. These air liners are the last word in aeroplane construction, carry 18 passengers, and are equipped with buffet and easy chairs with a steward in attendance.

The flight will be made from Croydon Aerodrome, today known as Britain's premier air-port, where passenger aeroplanes take off daily for Paris, Amsterdam and other points on the Continent. Here the visitors will be conducted through the hangars by competent guides who will explain to them the various types of machines used in modern air travel.

## Famine In China

Four Million In Shantung Facing Direst Extremity

Peking.—At least 4,000,000 in the province of Shantung and part of Chihli are facing extreme famine, which must be expected to become more severe as winter progresses, a committee of observers has reported.

The report grew out of the Chinese international famine relief commission's appeal to the Red Cross for aid and the request of the Red Cross for more exact information.

A survey was then compiled by competent foreign authorities and observers.

Thousands in Shantung were found already subsisting on bark of trees, chaff and grass.

While the Chinese famine relief committee thought that "civil war, banditry and exorbitant taxation" were also equally to blame for Shantung's plight.

The peak of suffering was said not to have been reached yet. It will grow more intense from the Chinese New Year, January 23, until spring.

## Gives Brain To Science

Noted Russian Scientist Bequeathes Brain To Noted Collection

Moscow.—"The brain pantheon," founded by Prof. Vladimir Bechtereff, noted Russian psychiatrist, to study the source of talent and genius, will shortly have a fourth brain added to the three already preserved—that of Prof. Bechtereff himself.

The noted scientist, who has been devoting much time in recent months to organizing the brain pantheon which had been approved by the Soviet Government, died recently from paralysis of the heart after an extremely short illness. News of his death shocked the Russian scientific world deeply. Prof. Bechtereff willed his brain for scientific study.

The brains already in the collection are those of Anton Rubinstein, the famous pianist and composer, Dmitri Mendeloff, naturalist and chemist, and Alexander Kohn, writer.

### Soldiers Frozen To Death

Edigrade, Jugo-Slavia.—Clutching their rifles and in perfect marching order, the dead bodies of 17 soldiers, frozen in the cold wave a week ago, were discovered when the snow melted along the railway to Nish. Huge snowdrifts had prevented a search for them before.

### Is Victim Of Pneumonia

Calgary, Alta.—Garfield "Garry" Graham, manager of the Calgary branch of the Barber-Elis, Limited member of the Calgary Rotary Club and prominent mason, died in the Holy Cross Hospital here, after an illness which began nearly five weeks ago with an attack of pneumonia.

## Had Long Military Career

Lieutenant-General Sir Edwin Alderson, commander of the Canadian troops in the great war, who died in London recently. He won many decorations during a long military career. Sir Edwin was the author of several volumes.

## Extols Work Of League

No Other Power Could Settle Polish-Lithuania Dispute Says Senator Dandurand

New York.—No power on earth except the League of Nations could have effected a settlement of the differences between Poland and Lithuania this year, in the opinion of Senator Raoul Dandurand, Canada's representative on the council.

The leader of the Canadian Senate returned from Geneva on the Mauretania. Acceptance by the two countries of the supervision over distribution of troops along the border by military attaches of Great Britain, France and Italy implied a superior authority, said Senator Dandurand.

"I am strong in the conviction that outside of the League of Nations there is no power on earth which would have had the influence to impose its views and its will upon two independent nations," he added.

## Compensation For Lindbergh

Estimated That He Has Earned Quarter Of A Million

New York.—The New York Sun says: "Since his Paris flight it is estimated that Col. Lindbergh has earned about \$250,000. The Orteig prize was \$25,000; the profit from his book 'We,' and his newspaper articles was estimated at approximately \$200,000, and it was said that he received \$25,000 from the Guggenheim fund to finance his tour of the United States."

The Sun also says a director of one of the largest craft companies in the United States told of offering Lindbergh a job at anything he wished at any salary, and receiving this reply:

"I don't want any more money than I am worth. I won't take any job just to capitalize my name. If I should decide to work for you I want to be paid what I can actually earn. I'm not worth much, except my name, and I won't sell that."

## Relic of Pioneer Ship Mounted

The glittering figurehead of the Canadian Pacific Empress of Japan, pioneer trans-Pacific liner of the company, has been erected in Stanley Park, Vancouver, as an historic relic of the port. The Empress of Japan was put in the discard a few years ago, her place in the service being taken by the greater Empress. The Empress of Japan held, as does her successor, the trans-Pacific speed and comfort banner. This old vessel,

## Strengthen Canadian Navy

Government To Seek Authority For Purchase Of Two Modern Destroyers

Ottawa.—The Government will seek authority at the coming session of parliament for the purchase of two new modern destroyers to be delivered within three years. The new destroyers will replace the Patricia and Patriot. The Patricia and Patriote will be sold out of the Canadian navy.

Construction of the first of the new destroyers is to be commenced at once. In the meantime, arrangements have been made with the admiralty to obtain two destroyers to carry on with until the new craft are ready. They are H.M.S. Torbay and Toredor, and the Canadian Government has authorized the commencing of work forthwith at Portsmouth to recondition the vessels and bring them forward for Canadian service.

It is expected they will arrive in Canada toward the end of March.

The Torbay and Toredor were built by Thornycrofts and belong to the same group as the S class admiralty destroyers. Eight of these compose the eighth destroyer flotilla in commission on the China station. Three are in commission and two are in reserve in the Australian naval service. One is in reserve commission on the Mediterranean station.

## British Cattle Infected

Foot and Mouth Disease Breaks Out In Several Centres

London.—Twenty-six outbreaks of foot and mouth disease in six widely distributed centres of infection has necessitated declaration of a "stand still" area by the ministry of agriculture. The effect of the declaration is to prohibit movement of cattle, sheep, pigs and goats in the area without a license. The movement of them from the "stand still" area to a free area is forbidden and markets will be strictly regulated.

The "stand still" area covers practically the whole of the Midlands and part of Yorkshire and Lancashire.

### Employment Situation Improves

Ottawa.—The seasonal losses in employment recorded at the beginning of December were on a smaller scale than on the same date in any other of the last eight years except 1922, and the situation continued better than on December 1 in any previous year of the record. Statements were tabulated by the Dominion bureau of statistics from 6,276 firms employing 886,430 persons compared with 892,143 in the preceding month.

### Mexico May Buy Airplane

Washington.—Deciding upon a "distinct relaxation of the air craft or war munitions embargo against Mexico, the state department granted a license to the Mexican Government to purchase the tri-motored plane in which Mrs. Evangeline Lindbergh flew from Detroit to Mexico City. The permission given to Mexico to buy the plane was the first step taken under the new policy.

## APPROPRIATION OF LARGE SUM FOR H. B. ROAD

Ottawa.—A further appropriation of several million dollars for the Hudson's Bay Railway will be included in the railway estimates at the coming session of Parliament.

The amount will not be decided until the engineers report as to the extent of the work which can be accomplished during the year, the contract for the last section of the road having been awarded.

The appropriation for the current year was \$5,100,000 and good progress has been made.

As the Canadian National Railway last session got approval of a three-year branch line program, it is not expected that much legislation will emanate from that quarter this year.

The Minister of Finance will present a bill to ratify the agreement concluded some time ago with the Canadian Northern income bond holders.

## Severe Weather In Europe

Seven People Perish From Cold In France

Paris.—Northeasterly gales with snow, which have been raging along the entire Atlantic seaboard, from Dakar to Dunkirk, have brought Europe and Africa to a realization that winter has come.

Cherbourg reported an 80-mile gale, Calais and Boulogne channel services have been interrupted and the air service between Paris and London has been entirely cancelled. Veritable mountains of mail are awaiting shipment from all French ports.

Seven lives are reported lost in France alone, mostly in the northern sections, which are buried under 15 inches of snow. Floods are threatening Rabat, Casablanca, and the Moroccan rivers are overflowing in torrents, especially the Ouergha, where Abdel-el-Krim's forces fought the French in 1925, which is out of bounds, making a lake from Melnes to the sea.

In France the Seine and Marne are rising and a recurrence of the great floods of 1910 and 1921 is feared.

## Working On Mine Railway

Supplies Are Being Rushed Into The Pas District

The Pas, Man.—Engineers of the Canadian National Railways are hurrying supplies into The Pas district for an early start on the construction of its 85-mile mine track. Two of the system's locating parties, numbering 50 men, are already at work under the direction of Frank Haven, reconnaissance engineer.

At present there are between 250 and 275 men employed on the construction of the work under the direction of K. A. Ramsay, superintendent. These men are preparing right of way through muskeg country overlying limestone rock and boulders and thickly timbered with trees of medium growth.

Cutting of the right of way starts at the ballast pit four miles from the spur and the objective for this winter is Cranberry Portage, 50 miles further on, according to H. A. Dixon, chief engineer of the western division of the Canadian National Railways.

## The Death Toll

Final Figures Show That 32 Children Lost In Quebec Fire

Quebec.—According to Rev. Mother St. Romuald, superior of the Hospice St. Charles, the death toll in the conflagration which destroyed part of the institution on December 11 cannot be greater than 32.

She added that 28 children remained to be brought back to the hospice but that definite trace of all of them had been secured. So far 30 bodies have been discovered. Reports to the effect that parts of other bodies had been found were discounted by the coroner.

At the Moisan morgue it was stated that no such discovery had been made, while the mother superior said that as far as she knew the reports were false.

## Increased Home Consumption Of Milk Products Is Cause Of A Decrease In Exports

The totals just issued by the Dominion Bureau of Statistics for the year ending with November show a decrease in the exports of milk products as compared with 1925. On the other hand there has been an increase in the imports. These figures following a recent announcement that there are 50,000 more milk cattle than there was a year ago, would, at first glance, indicate that the Canadian dairy cow is not as efficient as she used to be.

The experts of the department of agriculture, however, come to the defence of the cow and give a number of reasons for the present situation. There has been a great increase in the domestic consumption of milk and milk products in Canada during the past year. It is estimated that there are 100,000 more people here than there were a year ago and the experts say that it takes 1,000 pounds of milk a year to supply one person with milk, cream, butter and cheese, so there is one hundred million pounds accounted for. Of course the more used at home, the less there is to ship abroad.

Canadians on the average are using more cheese and butter than in previous years. Better times have helped the butter consumption and advertising campaigns have increased the use of cheese as well as placing in the homes a more uniform type of cheese.

Dr. Riddick, dairy commissioner of the department of agriculture estimates that the production of butter, taking the Dominion as a whole, was about equal this year to the year previous. There was a shrinkage in the prairie and an increase in Ontario and the east. When there are big wheat crops in the west the people there do not seem to give as much attention to dairy farming as when the cereal growing is less profitable.

The total amount of butter exported this year was 27,714 cwt., valued at \$1,094,694, whereas the year before it was 28,014 cwt., valued at \$3,358,960. On the other hand Canada imported \$3,503,833 worth of butter this year and \$3,324,639 the year before.

In cheese the export figures are not far behind last year. The value of Canadian cheese exported for the 12 months ending with November was \$22,610,668, and the year before at \$25,244,029. In volume the exports compared 1,152,898 cwt. and 1,334,832 cwt. Canada imported \$585,782 worth of cheese in the last 12 months and \$420,474 the year before. Most of the Canadian cheese went to the United Kingdom.

### Captain Did His Best

Even If He Could Not Carry Out Orders

Lord Hewart, Lord Chief Justice, told this story at a Liverpool Ship-brokers' dinner. His Lordship was delayed by the fog which for several days hung over most parts of the country.

"It reminds me," he said, "of a story once told me by the captain of a great liner. When he was second mate they were coaling at Valparaiso, and the captain showed him a telegram he had received from the owners: 'Move heaven and earth to get to Sydney.'"

The captain sent the following reply: 'Heaven and earth not available. Raising hell. Things are moving.'"

### Gas Masks For Mules

Fumes of hydrogen-sulphide gas pouring from the oil wells of the Crane-Upton field here have proven so dangerous that voiceless and animals have been provided with gas masks. Mules submitted to the masks with better grace than did the men. Because the gas is almost odorless it is necessary to wear the protectors constantly.

### Radio Health Talks

From one coast to the other, a chain of Canadian radio stations now send out health talks each week, — a special staff? — It is a special series prepared by leading Canadian medical and lay authorities and released through the Canadian Social Hygiene Council and individual stations.

W. N. U. 1714

### Open Roads In Winter

Movement Is On To Make Motor Traffic Possible The Year Round

While the efforts which are being made by businessmen in the more important cities and towns of Saskatchewan in co-operation with some of the neighboring municipalities to keep open main traffic roads during the winter months are quite laudable, such volunteer efforts will not afford a permanent solution of the problem.

The time will come, no doubt, when the work of keeping the main provincial highways in operation during the winter months will be regarded as almost as important as keeping them in good repair during the summer. When this is generally appreciated, it is to be expected that winter maintenance will be handled by a central authority in the interests of efficiency and economy and in order to secure co-ordination, in the same way that summer maintenance is carried out on through-traffic highways.

In the meantime members of urban boards of trade, rural municipal councillors and road machinery companies are "showing the way" by conducting experimental work the results of which will be watched with considerable interest. Plows, packers, tractors and other forms of machinery are being pressed into service in widely scattered districts in Saskatchewan this winter in an effort to keep the road to town open. It is reported that some of the methods being adopted call for very little expenditure in machinery and, of course, at this time of the year, labor costs should not be very great.—Saskatchewan Farmer.

To the woman who carries her age well life isn't much of a burden.

### To Explore Northern Area

Expedition To Thelon River District To Be Undertaken

Another chapter will shortly be opened in the history of exploration in Canada's great northland when, some time in January, W. B. Hoare, of the Northwest Territories branch of the Department of the Interior, begins his trip that will last between one year and eighteen months to that region at the junction of the Hanbury and Thelon rivers. These flow eastwards out of Great Slave Lake and empty into Chesterfield Inlet.

Mr. Hoare's special task will be to carry out a census of the wild life in that country and among other things, study the migrations of the caribou. His journey has been prompted by reports that musk oxen still survive on the Canadian mainland, and although their numbers are dwindling, there are several herds of them browsing in the neighborhood of the Hanbury and Thelon rivers.

### Outlawing War

Question Appears To Be A Constitutional One In The U.S.

The New York World says that "it has been suggested by President Coolidge that an agreement to outlaw war would conflict with our clause in our constitution which gives to congress the power to declare war. It seems rather sad to think, just because a century and a half ago a revolution wrote down certain words, that war must go on forever in this world. Would it be treasonable to suggest that, even if this constitutional objection should be found to be valid, the constitution itself might be changed in order to permit the establishment of peace?"

"Are the prerogatives of congress so sacred, or is the constitution so immutable, that the progress of civilization must cease?"

Colonies of African white ants often raise mounds of earth as high as eight or ten feet.

## One By One The Original Leaders Of Bolsheviks Have Been Expelled From Party

The communist party in Russia has just celebrated with much display, the tenth anniversary of its seizure of power in Petrograd. The most remarkable incident in these proceedings is the expulsion, or degradation of a number of the party leaders through whose energy the coup d'état was made possible on that famous November night in 1917. Lenin planned, guided, directed; but until the last moment he remained behind the scenes in hiding. It was Trotsky who, in innumerable meetings and conferences, led the public agitation against the Kerensky government. It was he who, as head of the Bolsheviks' Military Revolution committee, actually organized the coup d'état. His name was coupled with Lenin's in the early years of the Soviet regime. As commissar of foreign affairs he astonished the Germans by his defiant attitude during the peace negotiations at Brest Litovsk. Later, as commissar of war, he threw himself with extraordinary energy into the work of organizing out of a rabble the Red army which, in the end, defeated Kolchak, Denikin, Yudenich, and Wrangel, and came within an ace of taking Warsaw. Lenin is dead; Dzerzhinsky, the founder of the Cheka, is dead. And now, on the anniversary of the victory which he did so much to achieve, Trotsky has been expelled from the party and reduced to the miserable status of a common, unprivileged citizen of the Soviet union.

Others who once occupied high positions in the councils of the party have shared, to a greater or less degree, in Trotsky's degradation. Zinovieff, once the despotic Bolshevik satrap of Petrograd and for many years president of the executive of the Communist International, has already been thrust, like Trotsky, into the outer

darkness. Kamenoff, until lately Soviet ambassador in Rome, and Rakovsky, formerly ambassador in Paris, have been expelled from the Central committee and forbidden to hold administrative posts. Peterson, once commandant of the Krenalla, Smigla, and other less prominent men have suffered a like fate. Yoffe, who at one time was constantly employed as a diplomatic envoy, has shot himself. Others fill the anniversary stage. Those who were once acclaimed as "heroes of the revolution" had to play hide and seek with the troops of the Cheka in their efforts to attract some slight attention during the festivities. They, too, are denounced in their turn as "counter-revolutionaries" and "enemies of the working class." Stalin, the Georgian, has won at last in the struggle for the heritage of Lenin that has lasted since the leader's death.—London Times.

### Winnipeg Newspaper Union

A Smartly Simple Frock

This smartly simple frock will be found suitable for all daytime wear. The bodice opens at the centre-front, and is joined to the skirt, having two plaits at each side of the front. There is a belt across the one-piece back, and buttons adorn the front and pointed cuffs on the long tight-fitting sleeves. No. 1605 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 38 requires 3 1/2 yards 39-inch, or 2 3/4 yards 54-inch material. Price 20 cents the pattern.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the moment. Price of the book 10 cents the copy.

### Machine Writes Music

Ever since music has been written, composers have been forced to jot down the notes by hand. Now, however, Katherine Giron, composer-pianist, has invented a musical typewriter which she claims will supplant the old method. Orchestra leaders and composers using it can dash off a piece of music almost as easily as they could play it on the piano.

### Butter Production Rises

Canada's production of creamery butter in 1926 amounted to 178,156,375 pounds, according to the Dominion Bureau of Statistics. This is an increase of 8,661,408 pounds over the preceding year.

## Quebec, the Birthplace of Winter Sports in North America

Why should winter, that severe and blustering season, yet be the perennial breeder of a hearty and tingling cheer? To avoid asking you another, you should be told that rigorous season gives mankind the chance each year to reassert a strong faith in itself. The north wind may blow, and we may have snow, but that is no reason for despondency—it is, in fact, a supreme cause for rejoicing in a young strength that does not shrink from wintry weather. It is only fitting that the true centre of this recurring faith should be Quebec, which for more than 300 winters has been laughing off the chilly threats of winds and ice and snow. Long before the Pilgrim Fathers set foot on Plymouth Rock, the French-Canadian colonists had settled Quebec. Here they started the custom of winter sport carnivals during the months when blizzard and frozen St. Law-

rence would diminish travel. The snowshoe and the toboggan of the Indian then entered sporting life as did the ski of the Norwegian in later years. On the whole the character of winter sports has changed very little during these centuries. A new winter game is Indian golf, introduced by J. G. Strathdee, sports director at the Chateau Frontenac. In this game the player uses bow, arrows and targets instead of clubs, balls and holes. But the outstanding feature of Quebec's winter season comes in the week from Christmas to New Year's. In this period of continued play and infectious good spirits the snow-cov-

ered Plains of Abraham, Battlefields Park and the Chateau Frontenac toboggan slide are the main carnival grounds. Thousands of visitors from the United States engage in the sports and in the old Norman observance of Christmas and the dawn of the new year. During the last week in February comes the annual International Dog-Sled Derby. This race of 120 miles, covered in daily 40-mile stages, attracts famous dog mushers like the veteran Seppala and the young St. Goddard who won last year's race. These two drivers have become North America's symbols of wiry age and supple youth.

# Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

### CHAPTER XV.—Continued

The men gasped. Wasn't Jack Doran "the queer devil to ask a girl right out before every one."

"Will you marry me, Helmi, today?" he repeated.

Helmi simply nodded.

A shout of applause broke from the men, in which Bill Larsen did not join. He suddenly hated Mrs. McMann for her interfering ways; she'd made nice hash of things.

Mrs. McMann's face grew dark; she had been beaten, right here in her own house. Worse still, she stood to lose the best girl she had ever had. Jack Doran, with his big feelin' ways, would never let his wife sling hash to miners. Mrs. McMann caught her breath on the intake.

"Well, at least you might have given us a little warning. What's all the rush about, I'd like to know. It don't look well—that's all I have to say."

Mrs. McMann resented youth more and more as she grew older. The slimness and agility of Helmi reproached her ponderous bulk, and now, looking at the boy and girl, so clean, lithe and wholesome, who stood before her, she felt she hated both of them. They seemed to defy her; "crazy young fools—what did they know about life?" She hoped.

She blew her breath on her lips as if they needed to be cooled.

### CHAPTER XVI.

That afternoon Helmi and Jack drove to Bannerman, eight miles away, to find someone to marry them. Helmi wore the black silk dress which she had worn on the train with the lace collar, fastening the latter with

## YOUNG WOMEN SUFFER MOST

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was a awful sick each month, too, having pains in my back until sometimes I was obliged to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me and I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year and recommend it to others."—DONALDA FANTEUX, Ayer's Cliff, Quebec.

"Unable to Work"  
Canning, Nova Scotia.—"I had irregular periods and great suffering at those times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved."—LAURA J. EATON, Canning, King's County, Nova Scotia.

the sun-burst which Jack had given her at Christmas.

Mrs. McMann was horrified at the thought of Helmi being married in black. "I ain't superstitious, fiddly," she said, "but you know the sayin' 'Married in black, wish yourself back.'"

Helmi laughed—her little world was pulsing with joy; she hardly heard Mrs. McMann's doleful predictions. The mountains were bright with sunshine, the ice had gone out of the river, the world was very fair.

"Jack Doran is only a boy," said Mrs. McMann, "and I believe he asked you right out like that hopin' you'd refuse him, Helmi."

Helmi's eyes were pools of rapture. "I fooled him—didn't I? that Jack Doran? He'll know better next time than ask a Finn girl!"

Mrs. McMann looked at her and sighed. Helmi was too happy to yield to any discouraging suggestions.

Nothing dimmed the glory of the day for Helmi until they reached the top of the hill looking down at the little town of Bannerman, where a huddle of houses were grouped around the station. Then Helmi suddenly caught Jack's arm.

"Oh, Jack, I no like!" she said, "look at the little houses—they are like cats going to spring! It is not friendly."

Jack put his arm around her. "Don't be frightened, Helmi, nothing can hurt my Finn girl."

His eyes were tender when he looked at her, but Helmi's were full of tears. "It is a bad place, this,"—she said shivering, as she pointed down into the valley; "it is full of bad words and bad thoughts for us."

The river wound its wide blue ribbon below them, satiny and smooth, with no trace of haste or unrest. From where they stood they could see a smaller stream, which, coming down a wooded ravine, poured its waters into the larger stream with a musical murmur which came softly to their ears. They had stopped their horses at the top of the hill.

The arrival at the fateful spot and the solemnity of their mission gave eloquence to Jack's tongue: "We do not know each other very well, Finn-girl," he said, "but we love each other, and that's all that matters. Now, let us get one thing straight. We have to trust each other—that's all there is in getting married and making it go. I liked you, Helmi from the time I saw you first, because you have such a straight eye. I believe you are square, and I am too. I've never had a girl but you. You are not afraid now, are you Helmi?"

Helmi wished she could tell him everything in her past life—Jack would understand—but it was so hard to get always the right words in English.

Jack continued: "We are like two streams, Helmi dear, that join there and run together to the sea. We are going to join, just like that, and run together all the way. Once we join we cannot separate. It is a long way to the sea, too, for us, and there may be rocks and rapids and rough water; but we'll always be square, Helmi. You are not afraid now, are you dear?"

Helmi's eyes were misty with tears,

as she turned and looked into his. "I am not afraid," she said.

They went first to the postoffice to get the license. An elderly man, with a long beard, filled in the form which gave John Ward Doran, and Helmi Milander the right to be joined in the bonds of wedlock. For this the sum of five dollars had to be paid.

They asked for the Methodist minister, but found there was none. The Anglican minister was away, but the postmaster said the magistrate would be sure to be at home and he gave them directions to find his house.

It stood by itself, inside a broken picket-fence, a dishevelled, untidy little house, plainly occupied by a man alone. There were no curtains, and the blinds hung crooked, with torn edges; the steps leading to the screened-in verandah were broken, and the wire screening was bulged as if football games were often played inside.

"This looks like a rough house," said Jack, as they approached; "but never mind, Helmi, we'll get married all over again when we go to Edmonton, and in the biggest church there, with stained glass windows; and we'll have a car full of flowers, and bridesmaids and wedding-cake, and 'Here comes the bride,' and everything. But in the meantime, if this old boy is sober, we will get enough of the law on our side to go on with."

The magistrate, J. Edgerton Blackwood, late of Stoke-Poges, opened the door. His manner registered deep annoyance, his appearance suggested fatigue. A soiled collar, held only by the back stud, flared jauntily from his neck, and the condition of his shirt gave evidence that there had been some disappointment over his last week's laundry. Tufts of hair, like small brushes, grew out of his ears; his eyes were bloodshot, his voice hoarse. Indeed, Mr. Blackwood looked and felt much like a dog that has barked all night.

"What the h— do you want?" he asked, when he opened the door. The words, though ungracious, were spoken in the well modulated tone of the cultured Englishman—the voice that one hears in the most remote and most unexpected corners of the earth.

Jack paused a moment before replying. "Are you a Justice of the Peace," he asked in surprise.

"I'm everything, damn it! I keep the pound, am clerk of the township, do book-keeping for the storekeepers here, and play poker. What can I do for you?"

"We want to get married," said Jack, smiling. No one could quarrel with Jack Doran on this day of days. He felt Helmi's hand tighten on his arm, and noticed she was pale and frightened, but Jack had no feeling save pity for this dirty and disgruntled old man.

"Come in," said His Worship, at length, "come in and sit down." He left them to solve the problem of sitting down as best they might. Every chair carried its own burden of clothing, papers, cooking utensils, and other bric-a-brac. A horse-collar occupied one; a pair of rubber boots another. A square red stove stood in the middle of the floor, its damper hanging drunkenly from one corner; ashes from its end door had dropped down and were tracked over the floor. A tumbled bed, visible through the open door of the room adjoining, gave the impression that Mr. Blackwood had but recently left it. The table in the room was full of dirty dishes and empty bottles.

Something prompted the Magistrate to apologize.

"There's a flock of women here, but

## WAS SO NERVOUS and SHORT OF BREATH COULD HARDLY SLEEP

Mrs. Louise Baglin, Golden Lake, Ont., writes:—"For several years I was greatly troubled with my heart. I was so nervous and short of breath I could hardly sleep at night, and if I did sleep for a while I had bad dreams."

"I managed to keep at my work, somehow, until I began to have dizzy spells which got so bad I had to give up. I used many kinds of medicine, but found no help until I got a box of

After the first box I found a great change, and after two boxes I was as well as I could be.

"I told my mother, who had choking sensations, about them and they helped her greatly."

Price 50c, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

they're too damned independent to do a day's work since the miners opened. I would like to see them slowly starving and freezing to death. Damned foreigners that they are, who never should have been let come into a white man's country, anyway. Bohunks and Flans."

(To Be Continued.)

## Wireless Beacons For 'Planes

Machine Will Indicate Course By Strength Of Signals

Wireless lighthouses, or beacons, have been erected by Trinity House round the British coast to assist vessels in taking bearings in foggy weather, but the United States is showing the way with an ambitious system of wireless beacons to assist aircraft.

There are in the United States twelve private aviation companies who have flown 766,531 miles in the last three months, regularly transporting mails and passengers over 8,000 miles of air routes. It is planned to establish a network of wireless beacons at intervals of 200 miles along these airways.

The directive properties of the frame aerial will be employed and the transmitter will have two aerials erected at right-angles to each other, each radiating signals in the direction in which it points.

An aeroplane flying along a line of equal distance between two transmitters will receive audible signals of equal strength from each transmitter, but when turning in its course to left or right it receives one signal of greater intensity than the other.

These signals can be received on an ordinary receiving set, no special direction-finding apparatus being necessary. The aeroplane will therefore "ride on a slender ray of directed wireless."

## A World Famous Figure

Captain Gordon Campbell, V.C. Commanded "Mystery Ship" During War

It is understood that the regulations now governing retirement will shortly let off from active list of the Royal Navy several well-known captains who did distinguished service in the Great War. Among these, it is reported, will be Captain Gordon Campbell, the famous Mystery Ship, V.C. Captain Campbell was a lieutenant-commander in 1914. Before the war ended he had become a captain, V.C., and a world-famous figure. The Mystery Ship or "Q" ship as it was officially called, practically originated with him, and his fights and narrow escapes with submarines were frequent and most thrilling.

The "Q" ship was a fighting vessel disguised to look like a tramp, and carried a naval crew dressed in keeping with the supposed character of their ship. Captain Campbell is credited with having lost one ship in a scrap with a submarine and having been back at sea in another ship hunting U-boats before nightfall.

## Fruits On the Prairies

Great Variety Of Home Grown Fruits Found On Prairie Farms

An inspection of 3,812 farms in the provinces of Manitoba, Saskatchewan and Alberta made in 1927, showed that 3,411 had good vegetable gardens; 1,258 were growing small fruits; 379 had ornamental shrubs; 265 were testing standard apple trees and 213 were growing plums. Twenty years ago the number of prairie farms with pretentious flower and vegetable gardens was small and little attempt was made to grow fruits. Now a great variety of home-grown fruits is common to the prairie farm home menu, while vegetables of a wide variety grow to perfection. For two years in succession a Manitoba farmer has won the cauliflower championship at the American Vegetable Growers Association annual show.

A Scotch countryman entered a store with the view of purchasing something for his sweetheart. The salesman suggested an umbrella, a pair of stockings or possibly "something for her neck."

"The very thing," responded the countryman. "A cake of soap."

In excavating the third wall of the city of Jerusalem a stone ball shot from a catapult during the Roman siege was found.

## Little Helps For This Week

Even so, Father: for so it seemed good in Thy sight."—Matthew 11:26

For naught can come as naught hath been.

But what my Father hath foreseen, And what shall work my good, Whate'er He gives me I will take, Whate'er He chooses I will make.

My choice with thankful mood — Paul Fleming

If God gives us much, we are bound to be thankful and use it for Him. If He gives us but little, we are bound to be content and cheerfully to enjoy Him in it. — Matthew Henry

## THIN, WATERY BLOOD ALWAYS DANGEROUS

If Not Corrected Serious Results Sure To Follow

In no trouble is delay neglected more dangerous than in anaemia, thin, watery blood. It is very common in young girls and in persons who are overworked or confined within doors. It makes its approach in so stealthy a manner that it is often well developed before the trouble is recognized.

But taken in time the tonic treatment through the use of Dr. Williams' Pink Pills, so enriches the blood that good health and strength is speedily regained. The correction of anaemic conditions by Dr. Williams' Pink Pills is as certain as anything can be. Miss Teresa Heafey, Dunraven, Que., is one of the many anaemic sufferers who has found new health through the use of this medicine. She says:—"I cannot express too warmly my thanks for what Dr. Williams' Pink Pills have done for me. I was suffering from a badly run-down condition. I was very nervous, had little desire for food, and would feel tired out at the least exertion. In this condition I began taking Dr. Williams' Pink Pills, and before using them very long found my health gradually improving, and under their continued use was completely restored. For this reason I earnestly advise all weak girls to take these pills, feeling sure that they will do for others what they did for me."

Send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., and they will mail you free a useful little book on "Building Up the Blood." The pills can be obtained through any druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Sailors Preferred Jail

Sixteen sailors from India rebelled against further service on their ship when they learned that it was going to America. Arrested, they explained that they feared they would die from the cold in America. So their ship left for Norfolk, Va., and they went to jail for a month.

Milard's Liniment for sore throat

When a henpecked man sees his wife terrified by a garden worm, he gets some idea of where he stands in the scale of creation.

## VERY HARD LARGE PIMPLES

Spread Over Face and Hands. Cuticura Heals.

"My trouble began with a few pimples on my face and hands and soon spread all over them. The pimples were very hard, large and red, and feasted and scaled over. They itched and burned so that I scratched them, which caused eruptions. My face was disfigured, and I could not put my hands in water and could hardly do my work."

"A friend advised me to try Cuticura Soap and Ointment so I purchased some, and in about two months I was completely healed." (Signed) Miss Jennie Ducharme, 481 Giroux St., Norwood, Man.

Cuticura Soap, Ointment and Talcum are all you need for everyday toilet and nursery purposes.

Sample Book Free by Mail. Address Canadian Agents: "Cuticura Ltd., Montreal." Price, Soap 25c, Ointment 35c and 50c, Talcum 25c. "Cuticura Shaving Stick 25c."

Prof. Robert Wallace, commis-  
sioner of Manitoba mines, told the  
Caledonian Society at its weekly  
luncheon in Winnipeg recently, that  
mining developments such as had  
never been equalled in the history of  
Manitoba were likely to feature the  
next six months. Mining, he said,  
had to be looked upon as a business  
proposition. It so happened in this  
country that mines are found in  
places to which access was not easy  
and no railroad could be expected  
to lay tracks into the north country  
until it knew prospects there.

**French River Home of the Fighting "Muskie"**

E.A. FARINTOSH (LEFT) WITH  
35 LB. MUSKIE

A PORTAGE

"Muskie" are so plentiful at  
French River, Ontario, accord-  
ing to J. G. Strathdee, who runs the  
French River Bungalow Camp at  
this Ontario resort, that he and his  
mother, while paddling down the  
river, past the golf course, struck a  
muscalunge at least four feet long  
which was sunning itself near the  
surface of the water. The muskie,  
which was as surprised as the canoeists,  
leaped several feet out of the water,  
then vanished from view.

French River station is on the  
Canadian Pacific Railway, 215 miles  
north of Toronto, 60 miles north of  
Parry Sound, and 45 miles south of  
Sudbury. The Bungalow Camp is  
attractively situated on an elevation  
commanding a magnificent view of

the main channel of the French River  
and within 200 yards of the station.  
In addition to the Bungalow Camp,  
an outlying sub-camp is situated at  
Pine Rapids, at the head of Eighteen  
Mile Island, in the heart of the best  
fishing waters of the upper French  
river.

It has as an adjunct Pine Rapids  
Camp, which is 25 miles up the river.  
These two camps accommodate  
ninety people, and there are plenty  
of fish—muscalunge, Great Northern  
pike, pickerel, and small and large  
mouth black bass. There are thirty  
well built and comfortable bungalows  
at the main camp, while Pine Rapids  
has canvas houses built on wooden  
floors. French River is 215 miles  
North of Toronto.

Here is a tale told by Mr. Strath-  
dee, about a "muskie" with a tooth-  
ache. In August, this big fresh water  
tiger needs a fish dentist. Last year  
a visitor to French River hooked a  
30-pounder which immediately dropped  
to the bottom of the river and  
sulked. The knowing Indian guide  
tapped the rod with his knife: the  
vibrations went through the pole,  
down the line to the mouth of the  
"muskie", and irritated one of its  
sore teeth. The muskie then leaped  
clear of the water, and proceeded to  
give the fisherman a fierce fight last-  
ing three-quarters of an hour!

The muscalunge at French River  
run from 10 to 45 pounds, and one  
was caught in this well-known an-  
gling resort which weighed 55 lbs

**"BAKE-RITE"**  
flour  
C. H. NASH

**SPILLERS**  
DAYLIGHT MILLS

**"Everybody likes  
home made bread"**

SPILLER'S 'BAKE-RITE'  
FLOUR IS SOLVING  
THE PROBLEM

A Housewife in Gadsby says:  
"I used 'Bake-Rite' in my or-  
dinary baking methods. Will  
say that after baking and  
testing the different brands of  
flour for the past 16 years, I  
have at last found in 'Bake-  
Rite' the quality which I've  
been looking for.

"My bread was beautifully  
white, light and fluffy, easy to  
handle in mixing. Cake was  
fine grained, also very light  
in texture. My husband  
pronounced both bread  
and cake the best I had  
ever made. I also tried the  
flour in cookies and pie with  
the same results and can hon-  
estly say I am for 'Bake-Rite'  
flour from now on.
